

Why is Worksman Electric Tricycle The Best Choice?

Worksman Tricycles are especially well suited for Mobility, Recreation and Versatility.

- The **STABILITY** of three wheels allows you to get safely navigate the Streetscape, going as slow as you want or as fast as is safe.
- Worksman E-trikes are extremely intuitive to ride. After a few laps around town, riders get a great feel for the handling characteristics
- Tricycles don't need to be balanced or pushed hard at takeoff to stay up, so you can move about easily by starting slow and adding speed one pedal stroke at a time or with power at the turn of the throttle
- Worksman E-Tricycles do not require rider balance skills as a bicycle would. You can simply sit on the trike either while standing still or while in motion, knowing you do not need to lean into turns or feel out of control.
- Unlike a bicycle, on a tricycle you can sit comfortably while stopped so no need to jump on and off. Worksman E-Trikes offer Power-On-Demand. Meaning when you want to use the electric drive at any time, simply turn the throttle. Of course you can pedal whenever you wish to while having the confidence to complete your ride completely under power if you need to.
 - Your Worksman E-Trike has a full color display which informs the rider of battery life, Speed, time, and much more.

- Worksman E-Trikes are built in our South Carolina Factory, which is nearly 3 acres under roof and staffed by proud American Team Members.

Shown with optional swivel down armrests, rear fenders, and bar-end mirrors.

Is it easy to assemble?

Certain Worksman E-Trikes ship 99% assembled while others do require reasonable assembly. Check with our customer service department for details by calling 800 962 2453 or emailing cycles@worksman.com

Are Worksman Cycles More Durable Than Other Brands?

YES!!!!!!! A Tricycle is only as durable as its components and the company that makes them!!

Freedom to Choose:

As shown on our website, you can configure your E-Trikes with upgrades such as custom colors, custom gearing, tire upgrades and more. Have it your way!

What Are the Battery Details?

Worksman E Trikes utilize 48V Lithium Ion Batteries which are easily removed from the cycle for charging, or can be charged while installed on the trike. The battery has a lockable bracket to prevent potential theft. Each battery have LED Battery Life Indicators as well as a rear facing LED tail light.

What Electric System Drives the Tricycle;

Worksman E Trikes are front wheel powered. Powerful 500W systems come on our lighter duty trikes and 750W on the more heavy duty models. Either way, these tricycles offer power at your fingertips. Simply turn the throttle as you would the gas pedal on the car to attain the desired speed. These smooth operating motors quietly whisk you along.

Does The Tricycle Have a Reverse Function?

Each Tricycle has a red reverse button on the handlebar. This is intended for short backups to allow the rider to get out of tight spaces and then position themselves to go forward.

What Safety Features are Included on a Worksman E-Trike

Safety is a top concern. Each Worksman E-Trike is made by caring USA Worksman Team Members and the trike features Dual Brakes. A front hand brake is controlled by a lever on the handlebars and when that lever is pulled, it not only applies the brake, it cuts off the electric power to the front wheel. Also, Worksman E-Trikes feature foot operated sure stopping coaster brakes. Worksman E-Trikes include headlight and taillights.

What is the Weight Capacity?

Worksman E-Trikes come in many different styles, from our Lightning Folding Port-o-trike all the way to our Team Dual Lightning Trike. So we offer tricycles with weight capacities from 225 lbs all the way up to 550 Lbs. Worksman Heavy Duty Tricycles are legendary and used by so many of the world's leading companies for commercial applications. So there is a Worksman E-Trike for you.

Why is a Worksman Cycle the Right Choice?

CONFIDENCE + Reliability

Purchasing an E-Trike is a major decision, so the company you purchase from is critically important. There are many choices on the market today. Most all are imported cycles from fairly new companies that slap their labels on the cycle they source (mostly from China) and market aggressively on social media. But where will those companies be when you require spare parts years from now. Only Worksman Cycles can claim over 100 years in business and is America's Oldest Bicycle Manufacturer. We've supported the cycles we've sold for all of these years. Worksman has a state of the art factory that is close to 3 Acres under roof in Conway SC (we relocated from our NYC factory in 2017). We weld, fabricate Powder coat, build wheels, assemble and pack in our own factory. Work is performed by proud, hardworking USA factory Team Members, dedicated to our customer's satisfaction. (We do still have a facility in Queens NYC as well). The bottom line is that when you deal with Worksman Cycles, you are buying from a reliable USA based company with an unsurpassed history, and cycles made by American workers. And customers can call us during normal business hours and expect a live customer service representative to assist, If you buy from most other companies' .all we can say is buyer beware' .there are a lot of fly by night companies selling bikes these days. Worksman Cycles' continuous USA manufacturing and the same family ownership since 1898.
